

Dillon Drenzek

UP & COMING DEVELOPER

On a Mission

I have an eye for good design, a knack for elegant code, and a solid empathy for people. These three strengths are the foundation of the start of my career crafting technology that enhances peoples' lives.

Quick Learner

I started at Vizualiiz with zero experience in Angular 2. Not only did I learn it quickly, I became a resource for the team as we all learned the evolving framework.

Self-Directed

When Native was founded, I anchored development of the iOS app. The other developer was usually busy being the CEO, so I often implemented key features independently.

A Rare Unicorn

People who can design, as well as write code, are known as unicorns. All I'll say is that my natural habitat is among Photoshop layers and blocks of code, where I thrive on creativity.

Tech Translator

Not everyone speaks computer, but I'm proud to. I love helping others translate their ideas into code, or discussing technical concepts in terms they understand.

EXPERIENCE

Web Application Developer

VIZUALIIZ

FEBRUARY 2016 - JUNE 2017
SEATTLE, WASHINGTON

- Quickly learned Angular 2 & initiated application updates as framework evolved
- Helped architect application data model, REST API, data flows within Angular & project file structure to grow and accommodate fluctuating requirements
- Implemented key modules like user authentication, search & dynamic forms
- Lead front-end UI design & transition to a responsive framework using Bootstrap
- Advocated test-driven development & established front-end testing framework

iOS Developer

NATIVE (A TECHSTARS-BACKED COMPANY)

FEBRUARY 2014 - MAY 2015
BOULDER, COLORADO

- Designed, then crafted code to accommodate quickly evolving product
- Implemented core app features using Agile development methods
- Contributed to team meetings establishing product requirements & company goals

SKILLS

WELL-VERSED

PROFICIENT

Web Development

HTML5

Sass

Bootstrap 4

Node.js

Cordova
